MA 「間」
FOLDED SPACE

01

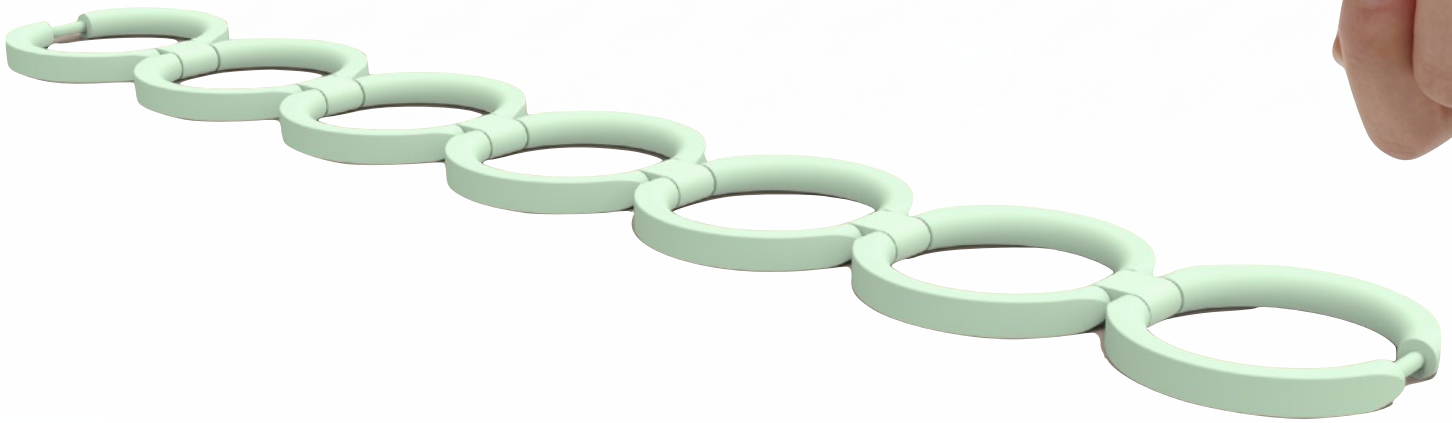

DAIRY PRODUCT

02

the appeal of the traditional craft of folding screens

DETAIL
SHOWCASE

MEET THE FEELINGS

This ring is inspired by **Chinese and Japanese ideas of space.** It combines the Chinese idea of “inside and outside” with the Japanese concept of “ma” (space between), allowing **the form to shift between enclosed and open states.**

这个戒指的设计源于中日屏风在空间观念上的差异：

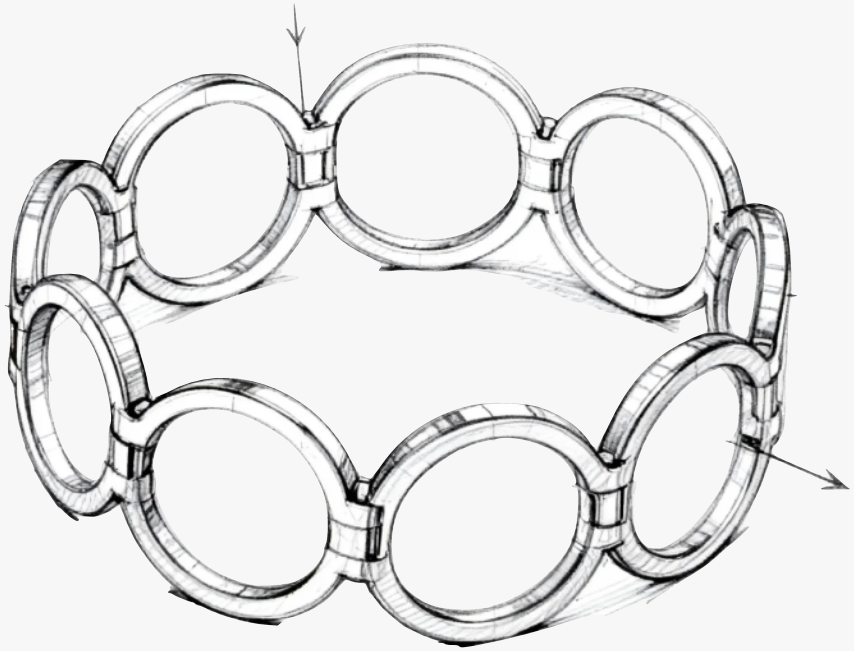

一方面承袭中国“内外有别”的空间哲学，通过叠合、围合的结构，形成明确的界限感与秩序感；

另一方面借鉴日本“間（ま）”的思想，使结构可被展开、重组，在开放与留白之间不断生成新的空间关系。

INSPIRATION STEMS FROM SPATIAL TRANSFORMATION

By folding and unfolding the ring, the wearer takes part in shaping space.
The abstract idea of space becomes something you can see and feel on the body.

佩戴者通过折叠与展开，参与空间的生成过程，将抽象的空间哲学转译为可被身体感知的当代饰品语言。

Ring ➡️ Bracelet

It symbolizes

enclosure / protection / harmony / fluidity

boundaries / traversal / reconstruction

它既象征围合与守护，也指向圆融与流动；

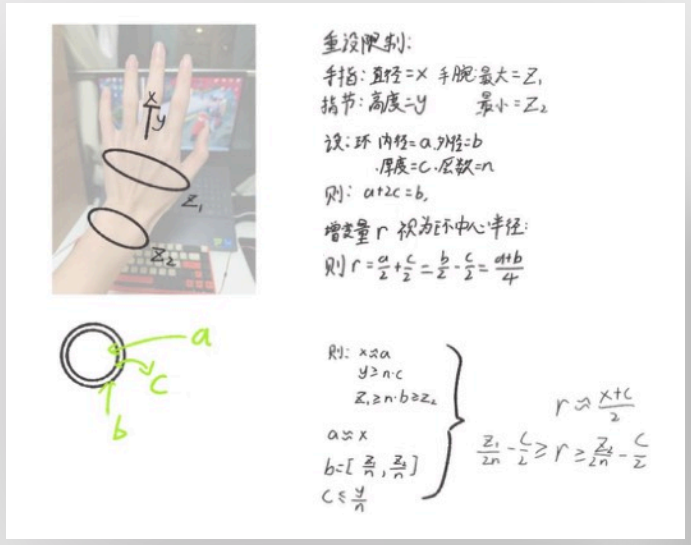

既有边界，也允许穿梭与重构。

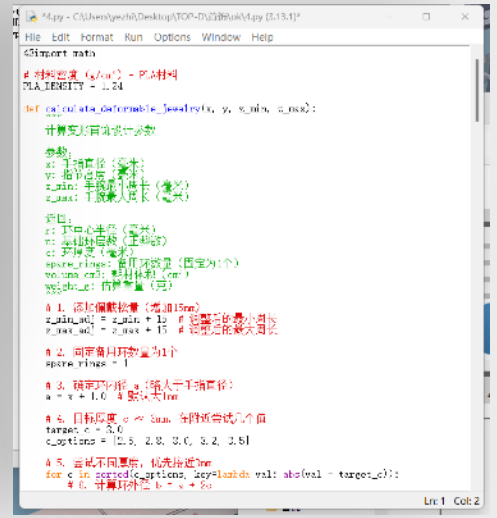

voodoo

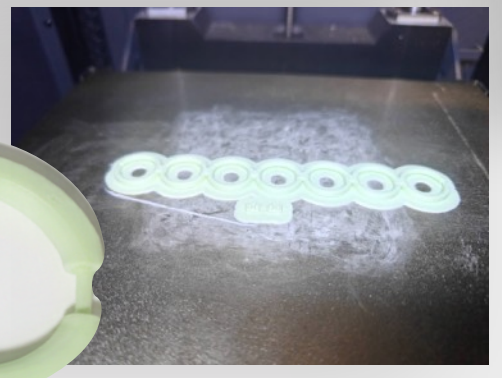

DESIGN DATA

The design is **based on real hand measurements**. Finger size defines the ring size, and wrist size defines how it opens into a bracelet.

This ensures comfort and fit in different wearing states.

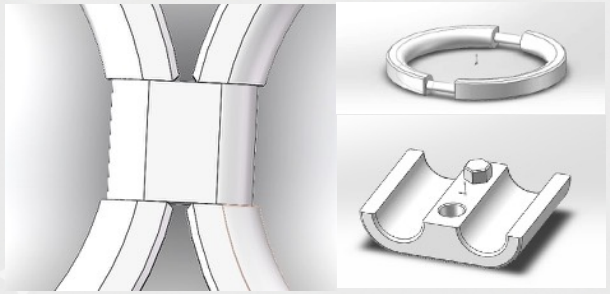

设计以手指与手腕的真实数据为起点：
手指直径（x）决定单环的内径 a，
指节高度（y）限制每一层环的厚度 c，确保多层叠加后不影响手指活动；
手腕最小与最大周长（z_min / z_max）则限定了环层数量 n 与外径 b 的取值范围，
使戒指在展开为手环时既不会滑落，也能覆盖不同佩戴松紧需求。

Experience and Feelings

The thickness and size of each ring layer are calculated to keep **the structure stable and smooth to rotate.**

通过设定“厚度≈内外径之差”的关系，保证各层环在旋转、展开时具备良好的力学稳定性与顺畅手感。

The structure is generated by an algorithm and optimized for 3D printing, so it **fits the body in all folded and unfolded states**.

算法自动计算出适合 3D 打印的结构参数，让首饰在“叠合—展开—重组”的过程中始终贴合身体尺度。

How to wear

The ring can be worn in multiple ways—**single ring, double-finger ring, knuckle ring, or opened into a bracelet**.

Each form represents a different spatial state.

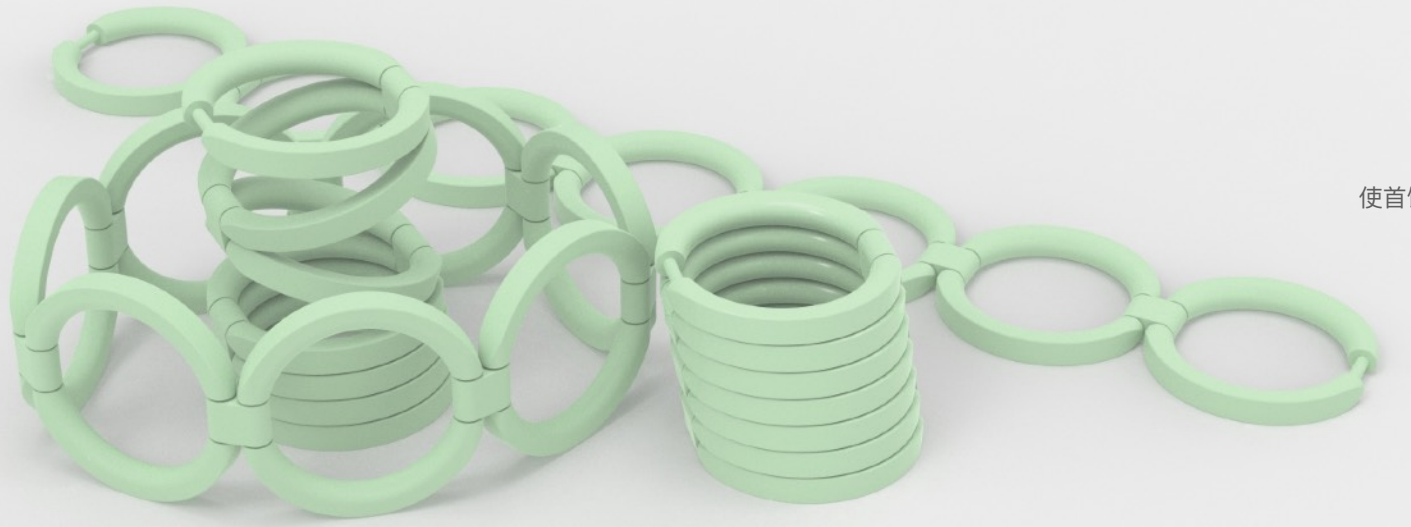

首饰在佩戴方式上的变化——从双指戒指、指虎式戒指、绑带式戒指，到展开后的几何圆环手环——是一次关于空间状态的切换。

MA — Folded Space

This ring is designed from the logic of space, not just shape.
By stacking and unfolding, it **changes from a closed form into an open, wearable space.**

A form that shifts with the body.

这枚戒指是从“空间”的逻辑出发设计的。
它基于手指与手腕的真实尺寸生成结构参数，

使首饰在佩戴过程中可以在“围合”与“开放”之间自由切换。

通过叠合、旋转与展开，

戒指从一个紧凑的边界转变为可延展的佩戴空间。
佩戴本身成为一次对空间的重构：

形式随身体变化，空间通过动作被感知。
